NODAL · LOGO USAGE · V1.0

Logo usage

Selected direction N1 · Sieve. Three traces meet one boundary. Two stop; one passes through a narrow opening and is caught at a checkpoint. The mark is a miniature of the product itself: observed versus withheld. Use the files in `ASSETS/`; do not redraw.

paperLight	#F3F1EA · RGB 243 241 234	Light background (docs, print)

Lime is a signal, not a fill colour: one accent per composition. Lime text needs a dark background; on light backgrounds use lime only as a fill with an ink outline.

Typography

WORDMARK & HEADLINES

Inter SemiBold

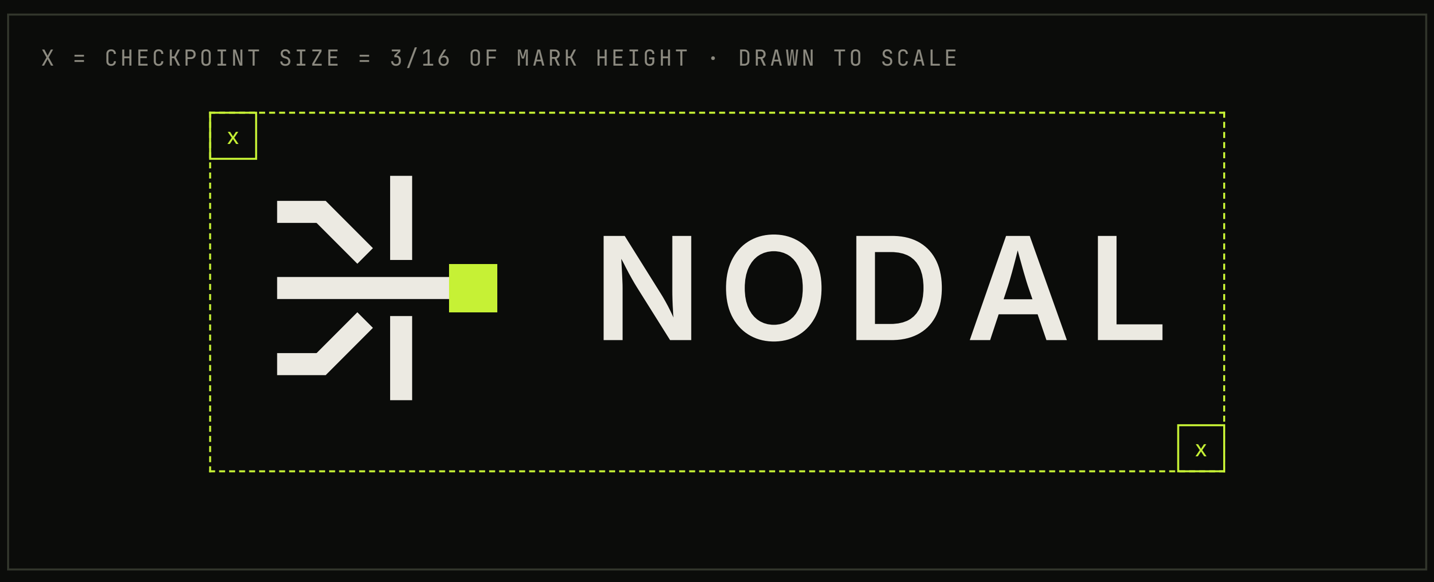
Wordmark: Inter 600, uppercase, +0.12em tracking. Headlines: Inter 600, −0.035em. Open-source (SIL OFL). Alternative: IBM Plex Sans.

TECHNICAL LABELS

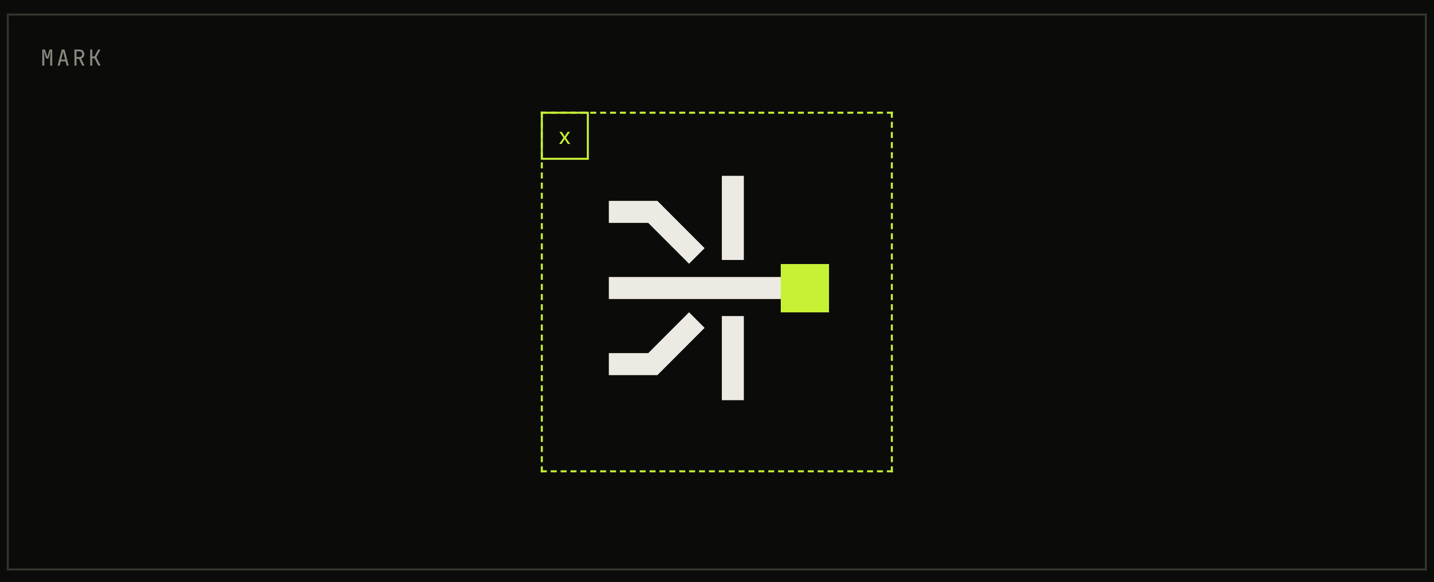
`TRACE LAB / PROTOTYPE`

JetBrains Mono 400–500, uppercase, +0.12em. Open-source (SIL OFL). Alternative: IBM Plex Mono.

Clear space



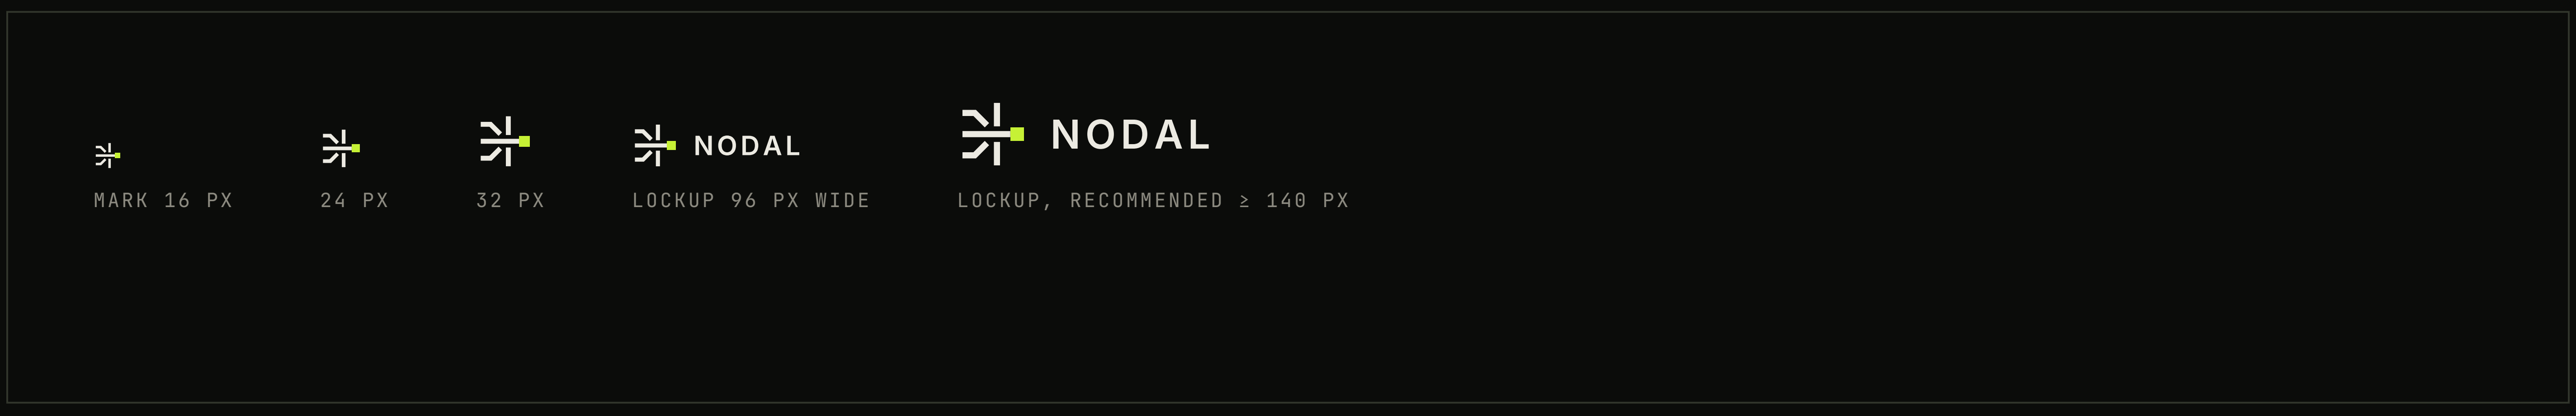
X = CHECKPOINT SIZE = 3/16 OF MARK HEIGHT · DRAWN TO SCALE



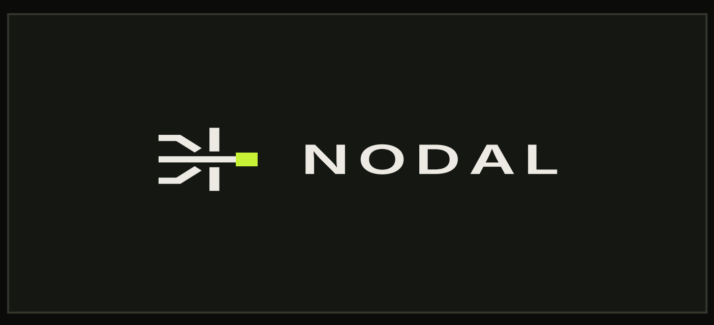
MARK

Keep at least x of empty space on every side. Nothing — text, edges, artwork — enters it.

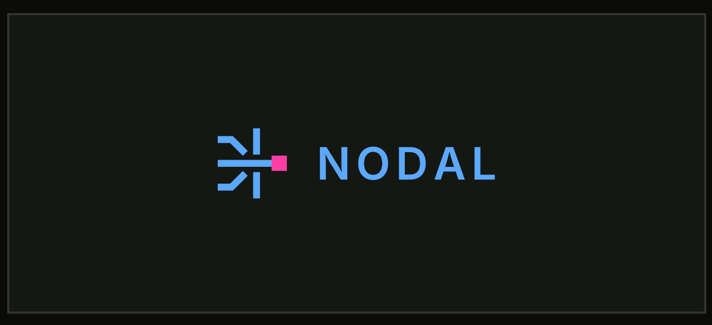
Minimum size



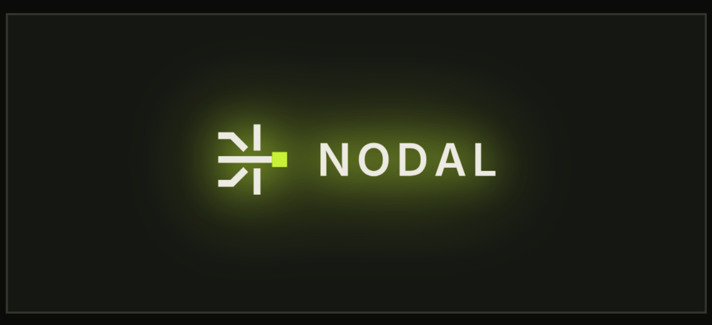
Incorrect use



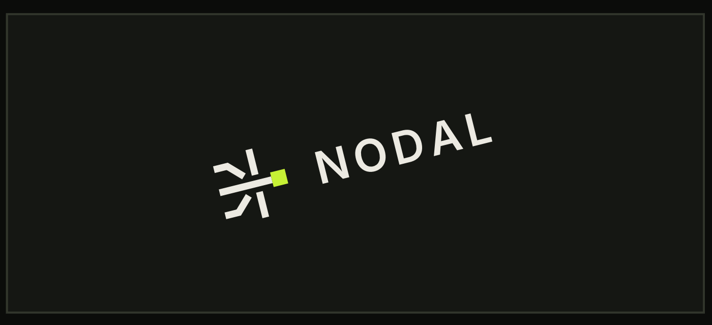
✕ Stretch or squash



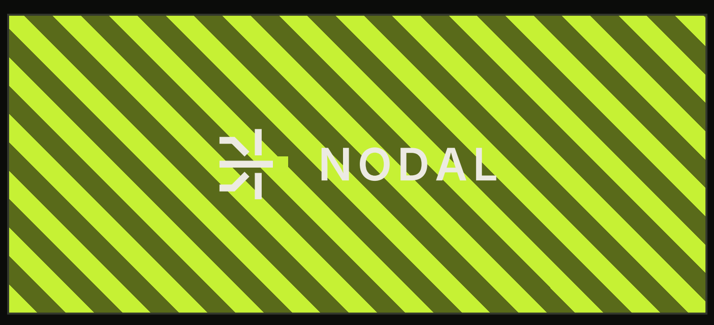
✕ Recolour the mark or wordmark



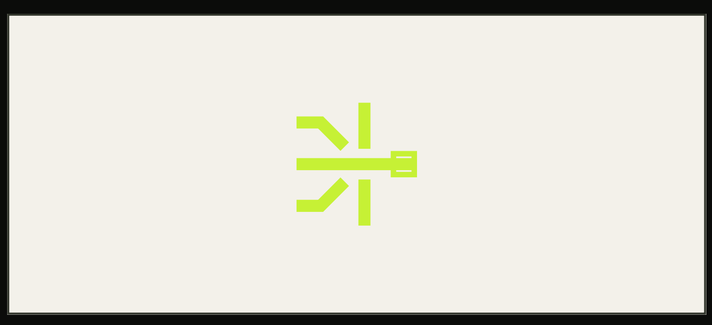
✕ Add glow, gradient or shadow



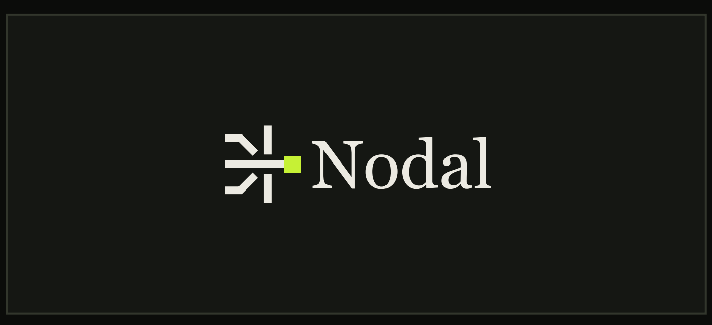
✕ Rotate or tilt



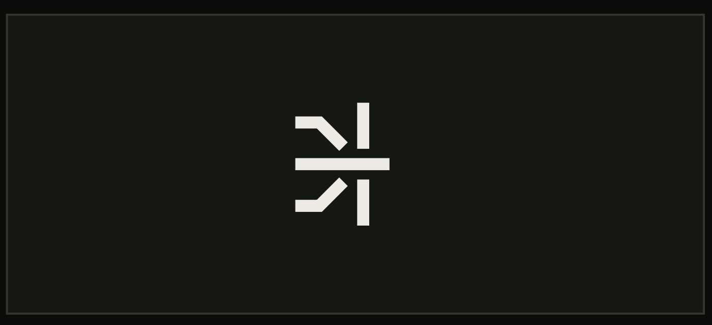
✕ Place on busy imagery



✕ Lime mark on light background



✕ Change the spacing or font



✕ Remove or move the checkpoint
